Career Objective

To secure a position in cybersecurity where I can apply my skills in threat analysis and vulnerability assessment to protect digital assets and strengthen organizational security while continuously enhancing my technical expertise.

Education

Bachelor of Technology (CSE – Cyber Security)
Sagar Institute of Science & Technology, Bhopal -MP
Current CGPA: 7.13 | (2022-Present)

Higher Secondary
Model Higher Secondary School, Ujjain - MP
79.4% | 2022

Senior Secondary
Model Higher Secondary School, Ujjain - MP
79.6% | 2020

Skills

- **Web:** HTML, CSS, JavaScript.
- **Cyber Security:** Networking, Cryptography, Ethical Hacking, OWASP TOP 10.
- **SOC:** Log Analysis, Microsoft Sentinel, KQL.
- **Programming Languages:** Python, C++.
- **Tools:** Git, Github, Nmap, Metasploit, BurpSuite, Wireshark.
- **Operating Systems:** Windows, Linux.

Achievements

- **Earned NCC 'A' Certificate** after successfully completing basic training under the National Cadet Corps (Army Wing), demonstrating discipline, leadership, and teamwork.
- **Secured 1st place** in the college-level CTF event "Crack the Hack".

Projects

Secure Electronic Health Records
Technology: Python, MetaMask, Ganache (Blockchain), HTML, CSS, JS .
SEHR is a blockchain-based system that lets patients securely upload, manage, and share medical data with full privacy, integrity, transparency, and controlled access through a decentralized architecture.

Integration of SIEM with IDS
Technology: Python , Streamlit, ML.
Developed a real-time IDS and SIEM system that monitors real-time network traffic, detects threats using rule-based and ML techniques, auto-blocks malicious IPs, and provides centralized logging and alerting for rapid incident response **.**

VulnSage – AI Web Vulnerability Scanner
Technology: Python, Groq API, Playwright.
Built an AI-driven web vulnerability scanner for OWASP Top 10 detection using automated crawling, smart scanning, browser-based testing, and AI-based risk reporting and prioritization.

SOAR SOC Assistant
Technology: Python(Flask), React, Agentic AI, ML.
Developed a real-time SOAR platform for SOC teams with Integration of virtual chatbot assistant, AI powered incident analysis, automate response, auto block threats, AI report generation etc.

Certifications

- Ethical Hacking Training — **Hacker Academy**
- Practical Cyber Security for Cyber Security Practitioners — **NPTEL | IIT Kanpur**
- Certified Ethical Hacker (CEH) — **Skill India**
- CCNA (Cisco Certified Network Associate) — **Cisco Networking Academy**
- Python Essential - **Cisco Networking Academy**

Co-curricular activities

- Coordinated multiple techno-cultural events at college level

Hobbies

- Playing Cricket

Inter-Personal Skills

- Team Player
- Problem-Solving
